FleetSoft

FleetSoft is a Fleet Management System that has been professionally designed and developed by a team comprising the consultants from the fleet operations and the software engineers from ASoft. The design has been done to cater the needs of all the fleet operations of any size and type. The software has an open license for the number of fleets that would grow from time to time. It incorporates multi-user as well as multi location, which enables the user to connect from any number of remote locations to the main server without running any update on the software. The software is highly secure and has built-in user authorization for all its features.

Features on Offer

- Multi User and Multi location access.
- Renting, Leasing, Hiring, Limousine & Chauffeur Management.
- Calculation of Insurance & Premium value.
- Fleet maintenance and expenses details.
- Definition and Specification of each fleet.
- Fleet utilization and movement history.
- Can be integrated with our Financial Accounting Software.
- Reminder of service, expiry of credit card, license, registration.
- Non-revenue mileage and fuel.
- Security Management.
- Fleet profit and loss.
- Calculate depreciation of vehicles.
- Fleet accident history.
- Traffic violation tracking.
- Vehicle de-fleet for resale, total loss and re-introduction.
- Loan Management.
- Sale of used vehicles.
- Inventory Management.

The technology we provide incorporates several other convenient features. If you wish to know more or if you need a live demo, please contact us.
